

After mailing the 2026 Notice of Appraised Value, Wilbarger CAD discovered several errors in the net-to-land inputs that were used to calculate agricultural productivity values. These errors resulted in abnormally large increases in DRY CROPLAND values.

We have since corrected this issue.

**DRY CROPLAND SUPPLEMENTAL NOTICES WILL BE REISSUED AND MAILED OUT TOMORROW (pink notice)**

Because we are issuing a corrected notice, you will have a new period to file a protest if you disagree with the revised values. Please refer to your corrected notice for the exact protest deadline.

This effects ONLY Dry Cropland!
